

Our current trash and recycle carts will be picked up by Waste Management on December 28

If you have been on the web page or reading information from the board you are aware we are changing Vendors for our trash removal. The community has often been neglected by Waste Management with respect to prompt pick up and waited days after several calls were made before they came out

"Business goes where it is invited, but stays where it is appreciated"

Consequently, we made the decision to move on to a new vendor. After reviewing services available GFL Industries was selected based on their presentation and references. As a side bonus we even were able to obtain a savings in cost as Waste Management had been adding on additional charges.

December 28th is listed as the last pick up for Waste Management and our new contract begins with GFL.

It is imperative that all cans Trash and Recycle be placed on the curb for that pick up as once emptied the cans will be removed by Waste Management. If you are not a full-time resident, you need to make arrangements with a friend or neighbor to have your cans out for pick up on that day. If this is not done, then Waste Management will charge a fee of \$75.00 that you will be responsible for paying.

Respectfully,

Patrick Nothnagel
Treasurer for the board
